

5 Support Professional Development

Training and professional development are powerful tools on the path to achieving results. We will work with you to create a customized plan to meet your needs, schedule, and budget to provide the best experience for your educators.

You can choose the training that works for your teachers:

- ▶ **Introductory and follow-up workshops:** A full or half-day of instruction that is customized for the skills you want to address
- ▶ **Webinars:** Live discussions and demonstrations in your area of need
- ▶ **In-class coaching:** Work side-by-side with a consultant who provides support and collaborative feedback
- ▶ **Online workshops:** Best practice routines and strategies modeled by literacy experts

Scholastic's representatives look forward to working with you in a shared mission to promote literacy and a love of learning for every child.
