

**COULD AN  
OCTOPUS  
CLIMB A  
SKYSCRAPER?**

...and other questions

Hilarious scenes bring octopus facts to life!

Octopuses are soft-bodied animals  
with eight arms.

Octopuses live in the ocean. These animals may  
look weird, but they are surprisingly smart.

They are cousins of slugs and snails.

Imagine if an octopus  
left the ocean to explore.  
Would she have fun?

# What if an octopus went shoe shopping?

She would have to pick **four pairs** of shoes.

She uses her **eight arms** like legs to walk on the rocky seabed.

Sometimes, if an octopus is in **danger**, she can **detach an arm**.

Then she **grows** a new one.  
But it would need a smaller shoe!

# What if an octopus went to a fancy dress party?

She wouldn't need to shop for a costume.

She could just change her **colour** and **body shape**.

Under the sea, an octopus can pretend to be a snake, a rock or a fish.

But for a party, she could turn herself into a banana or a beach ball.

She could even disappear by blending in with her **background** - that's a cool party trick!
